

Automation Testing Assignment – File Upload & Download Workflow

Objective

Automate the workflow in File.io (or the provided application URL).

Functional Requirements

Scenario 1 — Upload CSV File

1. Launch browser
 2. Navigate to application URL File.io
 3. Upload a .csv file
 4. Verify successful upload
 5. Navigate to next page
-

Scenario 2 — Upload Additional Files

1. Click on the **3 dots menu**
 2. Click on **Add File**
 3. Upload:
 - One image file (.png or .jpg)
 - One PDF file (.pdf)
 4. Verify files are uploaded successfully
-

Scenario 3 — Download Files

1. Click on **Download All**
 2. Verify files are downloaded successfully
 3. Validate downloaded filenames
-

Technical Requirements

Preferred Framework

Use any ONE:

- Playwright (Preferred)
- Selenium
- Robot Framework

Expected Folder Structure

```
project/
|
|-- tests/
|   |-- upload-download.spec.ts
|
|-- test-data/
|   |-- sample.csv
|   |-- image.png
|   |-- document.pdf
|
|-- pages/
|   |-- filePage.ts
|
|-- utils/
|   |-- downloadHelper.ts
|
|-- playwright.config.ts
|-- package.json
|-- README.md
```

Mandatory Validations

Upload Validation

- CSV upload success message
- Image upload success
- PDF upload success

Download Validation

- File exists in download folder
- Download completed successfully

Additional Expectations

Use:

- Page Object Model (POM)
- Explicit waits
- Reusable functions
- Proper assertions
- Clean code structure

Deliverables

Candidate should submit:

1. Source code
2. README with setup instructions
3. Test execution report
4. Screenshots/logs (optional)
